Inception: August 1, 2007

Firm assets: \$19.3 B*

Strategy assets under management: \$8.4 B

Vehicles: Separate account, commingled fund, CIT** and UCITS

Benchmark: MSCI Emerging Markets

Strategy objectives

Axiom invests in dynamic growth stocks globally. Axiom targets companies whose key business drivers are both improving and exceeding expectations through its disciplined process of data collection, analysis and portfolio construction. Axiom's dynamic growth strategy is implemented by the firm's experienced, stable, and collaborative investment team. The Emerging Markets Equity strategy concentrates its investments in companies located in emerging market countries or in companies that derive the majority of their revenues or assets from an emerging market country. The strategy focuses on growing companies undergoing significant change.

Emerging Markets Equity Strategy

AS OF DECEMBER 31, 2020

Commentary

During the fourth quarter 2020, the Axiom Emerging Markets Equity Strategy ("Strategy") outperformed the MSCI EM Index ("Index") net of fees. The Strategy strongly outperformed for the calendar year 2020, protecting on the downside during the COVID induced market sell-off early in the year and then participating effectively in the upside during the subsequent market rebound. The Strategy remains ahead of the Index on a net of fees basis over the 1-year, 3-year, 5-year, 10-year, and since inception periods.

Emerging markets turned in another good quarter with a return of 19.7%. The earnings outlook improved in the quarter with revisions going up for both 2020 and 2021. Investors focused on 2021 benchmark earnings growth that is predicted to grow 30%, a strong recovery from 2020. GDP estimates further boosted the outlook, with estimates for GDP growth in 2021 at approximately 5%. The economic improvement seen last quarter in PMIs, EMBI spreads, and currencies was maintained; the emerging market PMI is stable at 54, the EMBI spread ended the year at a 323 down from 398 at the end of 3Q, and the JPM EM Currency Index rose from 54.5 to 57.9. Within emerging markets, China continues to be key with a 38.8% benchmark weight. For the quarter, China generated a double digit return.

Six of the eleven sectors contributed positively to relative performance for the final quarter of 2020. The strongest relative sector was industrials, led by Contemporary Amperex Technology, a Chinese battery manufacturer. Other contributing sectors included information technology and health care. Information technology continued to benefit from strong spending on cloud services and mobile telephone systems. The standout performer in health care was Wuxi Biologics in China. Cyclical sectors including materials and energy, detracted from relative performance. As the quarter progressed, a cure for COVID became more likely, driving expectations for economic growth, leading to strong performance by cyclicals, of which the Strategy was underweight.

From a country perspective, Taiwan was the top contributor, driven by Taiwan Semiconductor (TSM). TSM is a world leading producer of semiconductors and offers a wide product and range. Demand was strong for semiconductors in 4Q 2020, leading to higher average selling prices (ASP) for TSM's products. China was the second best contributor to relative performance, and two industrial stocks, CATL and Jiangsu Hengli, stood out. CATL produces batteries for electric vehicles (EV). We expect CATL's EV battery sales to increase significantly in the coming years as more countries move to lowering their carbon footprints and embrace EV's. Jiangsu Hengli is a manufacturer of hydraulic components and hydraulic systems whose earnings outlook has benefited from rising construction levels in China as the country recovers from COVID. Furthermore, Hengli is positioned to potentially receive substantial orders from the US company Caterpillar.

In addition to the stocks mentioned above, Samsung Electronics and MercadoLibre were top performers. Samsung Electronics benefited from strengthening demand for technology products, mainly semiconductors, and MercadoLibre continued to grow users in Latin America as e-commerce engagement levels remained strong. Detracting stocks for the quarter included Pinduoduo, a major Chinese e-commerce platform, as well as holdings in NIO Inc, Reliance Industries, NAVER, and Escorts Ltd.

As noted above, the 2021 outlook for economic growth and earnings is positive for emerging markets. Additionally, emerging markets compare favorably at present to developed markets on a valuation basis; the EM price/earnings ratio is 14x 2021 versus the developed market price/earnings of 19x, and earnings growth is predicted to be 31% in 2021 versus 28% in developed markets. With continued progress towards control of COVID, the outlook for emerging markets should continue to improve. This continuous improvement will present attractive investment opportunities well suited to Axiom's dynamic growth philosophy.

Firm Compliance Statement: Axiom International Investors LLC (the "Firm") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Axiom has been independently verified for the period September 1, 1998 to December 31, 2020. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Axiom Emerging Markets Equity composite has had a performance examination for the periods August 1, 2007 to December 31, 2020. The verification and performance examination reports are available upon request. Definition of the Firm: The firm is currently defined for GIPS purposes as Axiom International Investors, LLC (the "Firm") is a registered investment advisor under the Investment Act of 1940.

Policies: Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Past performance does not predict or guarantee future results.

Composite Description: The Emerging Markets Equity strategy (the "Composite") is designed for investors who seek to invest in a broadly diversified portfolio of emerging market equities. Portfolios are invested in the full range of global emerging markets. Currencies may be actively managed to reduce portfolio volatility. The Composite represents the performance of all institutional emerging markets style fee-paying, discretionary equity accounts, regardless of asset size and comingled fund(s). The Composite was initiated and created in August 2007. A list of composite descriptions, a list of limited distribution pooled fund descriptions, a list of broad distribution pooled funds and performance results are available upon request.

Benchmark Description: The benchmark is the MSCI Emerging Markets index, which is designed to measure the equity market performance in the global emerging markets. The benchmark is calculated on a total return basis with net dividends reinvested, after the deduction of withholding taxes and is free float-adjusted market cap weighted and unmanaged. FX is based off London 4 P.M. close.

Significant Cash Flow Policy: Accounts with a cash flow greater than 20% of the portfolio market value are excluded for the month.

Reporting Currency: Valuations are computed and performance is reported in U.S. dollars. FX is based off NY 4 P.M. close.

Fees: Gross of fees returns are presented before management and custodial fees but after all trading expenses. Net of fees returns are calculated by deducting the highest fee from the monthly gross composite return which is expressed above in the stated fee schedule. Returns include the reinvestment of income. Performance is calculated net of withholding taxes on dividends.

Internal Dispersion: Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were in the composite for the entire year. If 5 or less accounts, N/A is shown.

Annualized Standard Deviation: The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period. The standard deviation is not required for periods prior to 2011.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

This may contain forward-looking statements within the meaning of the federal securities laws. Actual results could and likely will differ, sometimes materially, from those projected or anticipated.

We are not undertaking any obligation to update or revise any forward looking statements whether as a result of new information, future events or otherwise. You should not take any statements regarding past trends as a representation that trends or activities will continue in the future. Accordingly, you should not put undue reliance on these statements.

Axiom's standard policy is to use the MSCI country for country reporting purposes. There will be instances where the majority of a company's earnings and/or assets are located in a country within the strategy guideline, while the country of incorporation may be located elsewhere.

The information contained herein represents neither an offer to sell nor a solicitation of an offer to buy any securities or investment service. This strategy will only be offered through appropriate documents, copies of which may be obtained upon request from ClientRelations@axiom-investors.com. Offers will not be made in any jurisdiction in which the making of an offer or the acceptance thereof would not be in compliance with the laws of such jurisdiction. Investors should read applicable materials carefully before making a decision to invest.

Risks of investing in the strategy:

Potential loss of investment: No guarantee or representation is made that the investment program used by Axiom will be successful. The strategy represents a speculative investment and involves a high degree of risk. An investment in the strategy should be discretionary capital set aside strictly for speculative purposes. Investors must have the financial ability, sophistication/experience and willingness to bear the risks of an investment in the strategy. An investment in the strategy is not suitable for all investors. An investor could lose or a substantial portion of his/her/its investment. Only qualified eligible investors may invest in the strategy. Because of the nature of the trading activities, the results of the strategy's operations may be volatile from month to month and from period to period. Accordingly, investors should understand that past performance is not indicative of future results.

Fees and expenses: The strategy may be subject to substantial charges for management, advisory and brokerage fees. It may be necessary for those accounts that are subject to these charges to make substantial trading profits to avoid depletion or exhaustion of their assets.

Reliance on key persons: The strategy's manager or advisor has total trading authority over the strategy and may be subject to various conflicts of interest. The death, disability or departure of the manager or advisor may have a material effect on the strategy.

Counterparty and bankruptcy risk: Although Axiom will attempt to limit its transactions to counterparties which are established, well-capitalized and creditworthy, the strategy will be subject to the risk of the inability of counterparties to perform with respect to transactions, whether due to insolvency, bankruptcy or other causes, which could subject the strategy to substantial losses.

Volatile markets: Market prices are difficult to predict and are influenced by many factors, including: changes in interest rates, weather conditions, government intervention and changes in national and international political and economic events.

The above summary is not a complete list of the risks, tax considerations and other important disclosures relating to Axiom products or services. Prospective clients should read all disclosure documents provided by Axiom relating to its products or services before engaging Axiom's advisory services.

The information herein is only current as of the date indicated, and may be superseded by subsequent market events or for other reasons.

The Axiom Investors Collective Investment Trust is a trust for the collective investment of assets of participating tax-qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The Axiom Investors Trust is managed by SEI Trust Company, the trustee, based on the investment advice of Axiom Investors, the investment adviser to the trust. As a bank collective trust, the Axiom Investors Trust is exempt from registration as an investment company.
